The following reports have been made available with permission from the units. *They are to be used for reference purposes only, and are not to be shared outside of this process or for any other purpose.*

Please note that while these reports are in many ways excellent, there are weak areas that were addressed in the review process and that the units are committed to working on. In other words, the report should not be viewed as flawless or that the units have not been tasked to address areas for improvement. *Please use these reports for reference only and not as exact models for your own reports.*

Also note that the length of the report is proportional to the size of the unit and number of degree programs.

Finally, there have been changes to the reporting requirements so the sample reports will differ in some ways, most notably the student learning outcomes assessment portion of the report.

In addition to the resources available under the APR 2020 menu, each unit will be assigned to a group under My Groups. Access to your group is restricted to only those whose name has been given to OIRE.

The File Exchange in your group contains important APR related documents (alumni surveys, faculty survey, prior APR self-studies, etc.). Check it out!
